Addis Ababa, Ethiopia

SKILLS

Data Analysis & Machine Learning

- **Programming & Data Engineering** (Python: Pandas, NumPy, Scikit-learn; R ; JavaScript; SQL: advanced queries and window functions)
- **Big Data & ETL** (Spark, Hadoop, Java, Google BigQuery, Data pipelines, Data wrangling)
- **Data Analysis & Visualization** (Google Analytics, Looker Studio, Tableau, Power BI, Excel, DataBricks)
- **Predictive Analytics & Modeling** (ARIMA, time-series forecasting, machine learning models)

Communication and Collaboration

- Creativity
- Effective Communication
- Project Management
- Analytical Thinking
- Stakeholder Engagement
- User Experience (UX) Design

EDUCATION

Master of Business Administration (MBA)

American College of Technology

09/2019 - 11/2020

Courses

- Big Data & Business Intelligence
- Econometrics & Statistical Modeling
- Financial Analytics and Managerial Accounting
- Quantitative Analysis for Decision Making

Bachelor of Science in Engineering

Ecole Centrale de Nantes

09/2015 - 08/2019

Courses

- Computational Modeling & Simulation
- Project Management
- Database Systems
- Object-Oriented Programming & Data Structures

PROFILE

A data-driven Data Engineer and Analyst with experience building and optimizing Large Language Model (LLM) systems through high-quality training data, evaluation, and benchmarking. Skilled in Python, SQL, JavaScript, Power BI, and JSON-based workflows, I specialize in designing scalable data pipelines, improving model reasoning, and translating complex data into actionable insights. With experience in AI development and collaborating with cross-functional teams, I combine strong analytical thinking, a product mindset, and business acumen to deliver impactful, real-world solutions. Holding an MBA with a focus on Big Data and Business Intelligence, I leverage technical expertise, professionalism, and Agile methodologies to drive high-quality, data-driven outcomes and ensure projects deliver measurable value.

WORK HISTORY

Data Engineer

Turing | Remote (USA) 02/2025 - 09/2026

- Spearheaded end-to-end analytical projects and core reporting suites using **SQL, Python, and Databricks** to transform ambiguous business problems into clear, actionable insights for department leads and stakeholders.
- Built and refined **forecasting and performance models** in Python and advanced spreadsheets to surface key drivers of team performance, enabling confident cross-functional planning and growth strategy.
- Partnered with **Data and Analytics Engineers** to optimize data pipelines and ensure **data accuracy** across large datasets using **Databricks, SQL, and Python**.
- Designed **interactive dashboards and data visualizations** to communicate complex quantitative insights persuasively, driving business decisions and strategic growth opportunities.
- Leveraged **AI tools and prompt engineering workflows** to accelerate exploratory data analysis, troubleshoot complex data patterns, and enhance problem-solving efficiency.

Sustainability Data Engineer

Hydrus AI Inc. | Remote (USA) 06/2023 - 07/2025

- Led data-driven sustainability initiatives for **Fortune 500 clients**, leveraging **AI-powered analytics** to optimize resource efficiency and reduce carbon footprints.
- Developed **predictive models** using **Python**, **SQL**, and **machine learning algorithms** to identify sustainability trends, driving **18% cost savings** for enterprise clients.
- **Designed interactive dashboards** in **Power BI**, translating complex ESG data into actionable insights for executives and stakeholders.
- **Automated data pipelines** with **MySQL**, **PostgreSQL**, **Apache Spark**, and **ETL** processes (data wrangling), improving **data processing efficiency by 19%**, enabling real-time sustainability reporting and ensuring scalable, high-quality data delivery.
- Utilized **Java** and **Big Data tools** such as **Google BigQuery** to **manage large-scale data operations**, ensuring efficient data processing for sustainability projects.
- Conducted **advanced statistical analysis** with **Python (Pandas & Scikit-learn)** and **R** to measure environmental impact, compliance risks, and regulatory adherence.

WORK HISTORY

Head of Business Intelligence and Machine Learning

Afrbots Engineering Inc.| Hybrid (Kenya, Ghana & USA) 10/2021 - 01/2023

- **Led** development & execution of **13 projects** (5 launched digital products, 8 MVPs), driving **business growth** through insights from **Google Analytics** and **Tableau**.
- **Managed cross-functional teams** (engineers, creatives, and analysts), achieving **95% on-time delivery** via **Google Workspace** & **Agile methodologies**.
- Supported **K-8 STEM** and technology education initiatives by working closely with students, applying a **kid-friendly coaching style**, and translating technical concepts into **age-appropriate learning activities.**
- **Developed sustainable business models** using **predictive analytics** techniques like **ARIMA** and **machine learning models**, projecting a **30% increase in profitability** through refined financial viability forecasting.

TRAININGS

Google Project Management: Professional Certificate

02/2024 - 08/2024

- **Applied Learning Project:** Completed over 140 hours of instruction with interactive, real-world simulations created by experienced Google project managers, covering core program and project management skills.
- **Product Lifecycle and Strategy:** Trained in managing product lifecycle stages, including ideation, customer journey mapping, competitive analysis, and go-to-market strategies.
- **Road-mapping and Prioritization:** Practiced creating product roadmaps with prioritization frameworks like MoSCoW and RICE, setting KPIs aligned with business goals.
- **Agile Methodologies:** Gained expertise in Agile practices, including sprint planning and backlog management, using JIRA and Confluence for team collaboration.
- **Data-Driven Decision Making:** Learned to define and track performance metrics, using data visualization to support strategic adjustments and improve outcomes.

BIC Catalyzer Mini-MBA Program

03/2023 - 07/2023

- **Entrepreneurship Training Program:** Completed a comprehensive 4-month program focused on business strategy, market analysis, product development, and financial planning.
- **Strategic Planning and Analysis:** Applied frameworks and tools to develop actionable business plans, market research strategies, and financial projections, enhancing decision-making and supporting long-term business growth.
- **Competitive Analysis and Market Positioning:** Gained expertise in analyzing competitors and positioning products to align with customer needs and industry trends.
- **Brand Strategy and Visibility:** Leveraged brand strategy techniques, including content creation, social media optimization, and PR outreach, to increase product visibility and differentiate from competitors.
- **Revenue Optimization and Monetization:** Trained in monetization strategies such as pricing models, sales funnels, upselling, and cross-selling, optimizing product offerings to maximize revenue.
